-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saadatmanesh et al. U.S. Patent No. 5,242,438 in view of Narciso Jr. U.S. Patent No 5,441,497.

Saadatmanesh et al. disclose an apparatus for applying light to a site to be treated on a wall of a vessel in the human body, the apparatus comprising: a light-feeding instrument designed to guide light generated by an external light source to said site and to radiate said light onto said site; the light-feeding instrument comprising an elongated light guide that can be inserted into said vessel and can be displaced therein in a longitudinal direction of said vessel, and light-deflecting means **178** designed to direct said light fed through said light guide in a substantially radial direction onto said site to be treated as presently claimed (see Figs. 1, 3, 4, and 6-12).

As to claims 5, 6 and 28, they teach that the angle of reflecting surface relative to the longitudinal axis of the catheter (i.e., the longitudinal axis of the optical fiber) is about 45°, see col. 8, lines 48-49.

Saadatmanesh et al., described above, do not teach a holding means for fixing the treatment apparatus within the blood vessel as presently claimed as presently claimed.

Narciso, Jr. disclose a catheter device for applying light to a tissue on a wall of a vessel in the human body, the apparatus comprising: an optical fiber 11, adapted to guide light generated by an external light source to a site; a light diffuser 12; reflective disk 13; and a light translucent balloon 21, which adapted to hold the catheter device against the blood vessel (see Figure 2).

Therefore, at the time of the applicant's invention, it would have been obvious to one skilled in the art to modify the device of Saadatmanesh et al in view of Narciso, Jr. and use positioning/holding balloons in order to fixate/position the treatment catheter within the treatment site.

Conclusion

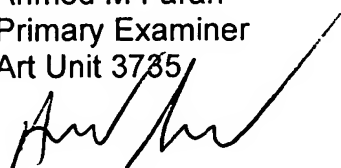

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ahmed M. Farah whose telephone number is (571) 272-4765. The examiner can normally be reached on Mon-Thur. 9:30 AM-7:30 PM, and 9:30 AM - 6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ali Imam can be reached on (571) 272-4737. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
